

How Do Rockets ESCAPE Earth?

**Every Action → Equal & Opposite
Reaction**

11.2 km/s — The Speed to Break Free

Escape Velocity Formula

The Tyranny of the Rocket Equation

Drop the Weight. Gain Efficiency.

**Lighter rocket + Less air + Less gravity =
Faster acceleration**

Orbit = Falling Around the Earth

Kepler's Third Law — Higher = Slower

Rocket Fuel Types

**From Single-Use to Reusable = 10-100x
Cheaper**

Indian Jugaad at Rocket Science Level
