

How Headphones KILL Noise

Sound = a wiggling air pattern

Wave + opposite wave = silence

It listens to the noise first

Fight noise with anti-noise

Great for engine hum, not for shouts

Two layers of quiet

Born from an annoying flight

Add sound to remove sound?!

It fixes itself every moment

Same mics, opposite job

Quiz

- 1) Destructive interference (anti-noise)**
- 2) Low-frequency steady**
- 3) Microphone**
