

Why Do We Feel DEJA VU?

You're not alone — it's normal

Familiar... but no memory attached

Your brain double-saves the moment

New place, old shape

A buried memory sneaks back

A mini spark of familiarity

It's not predicting the future

Tired brains slip more

Your memory is fact-checking itself

Sign of a sharp young brain

Quiz

1) Familiarity 2) Temporal lobe 3)
Jamais vu
