

Why Do We SNEEZE?

**A sneeze = an automatic REFLEX (a
clean-up tool)**

**Nose SENSORS detect irritation →
alarm!**

The SNEEZE CENTER in the brainstem takes charge

Deep breath → pressure builds → BLAST
out!

Up to 150 km/h — cover your mouth!

Sunlight makes 1 in 4 people sneeze!
(Photic reflex)

**NEVER force-hold a sneeze — it can hurt
you**

**Fun facts: eyes shut, animals sneeze too,
pepper = piperine**

**Irritant → sensors → brain → blast →
clean nose!**

**1) Sneeze = what type of action? 2)
Brain part in charge? 3) Sunlight sneeze
name?**

- 1) Reflex**
- 2) Sneeze center (brainstem)**
- 3) Photic sneeze reflex**
