

# Why Do We Have SEASONS?

**MYTH: closer = summer (WRONG!)**

**Real reason = 23.5° axial TILT**

**Tilt toward Sun = summer**

away = winter

**Direct rays = concentrated heat**

**Longer days = more heating time**

# **Solstices & Equinoxes mapped**

**Equator = steady**

Poles = extreme

**Hottest day comes LATER (seasonal lag)**

**No tilt = no seasons!**

# **Quick Brain Check!**

1.2.3 → PAUSE

**Answers: Tilt •**  
**India=Summer→Aus=Winter • Equator**  
**Steady**
